### REASONS FOR ALLOWANCE

1. Claims 1-6 and 11-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "so that an output beam of a desired diffractive order has a more uniform energy distribution than the input beam and is spatially separated from all other diffracted beams of different orders, wherein the spatial separation avoids interference between the output beam and any other diffracted beam of a different order" as set forth in the claimed combination. Claims 2-6 are also allowable based upon their dependence on claim 1.

Claim 11 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "spatially separating the output beam from other diffracted beams of different orders at the predetermined distance, where the output beam does not interfere with the other diffracted beams" as set forth in the claimed combination. Claims 12-15 are also allowable based upon their dependence on claim 11.

The prior art of record, Case et al teaches an off-axis beam shaper comprising an optical substrate and a diffractive surface, wherein the diffractive surface shapes an input beam. However, the prior art does not teach that an output beam is spatially separated from all other diffracted beams of different orders, wherein the spatial separation avoids interference between the output beam and any other diffracted beam

of a different order and there is no motivation or teaching to modify this difference as derived.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
